

CHASE

CH-515

Design Concept

Inspired by the fluid lines of contemporary fashion, the wave-like design introduces a dynamic sense of movement to the workplace, creating a feeling of ease and openness. Through its segmented structural form, it delivers enveloping comfort while expressing a calm and confident modern aesthetic.

designer team

Created by Horn Design and Engineering of Germany, an internationally acclaimed studio recognized with prestigious awards including the Red Dot Design Award, the iF Design Award, and the German Design Award.

With outstanding expertise in industrial design and product development, the studio has delivered internationally renowned office furniture solutions for leading global enterprises.

SEPARATED SEAT & BACKREST TILTING, COMFORTABLE FIT WITHOUT PRESSURE

Featuring an integrated seat-and-back structure, the design prevents the front edge of the cushion from lifting when reclining. It delivers immediate and balanced support, ensuring comfort without pressure on the thighs or restriction behind the knees.

ULTRA-THIN APPEARANCE DESIGN, COMBINING COMPATIBILITY & FUNCTIONALITY

Polished aluminum alloy support replaces traditional wooden panel construction, resulting in a lighter, more contemporary expression that highlights a modern sense of refined lightness.
